

Annex F. List of boxes, figures, and tables

Boxes

- Box 1.1 Letter from the Secretary-General of the United Nations 2
- Box 3.1 Importance of livestock in African farming systems 26
- Box 3.2 Farming system characteristics 28
- Box 3.3 Systematically disentangling factors that affect growth and yield 38
- Box 3.4 Yield gap analysis 41
- Box 3.5 Best technical means 42
- Box 4.1 Production potential of Sub-Sahara Africa 73
- Box 4.2 New Rice for Africa (NERICA) 75
- Box 4.3 Grazing land requirements and manure for arable farming 80
- Box 4.4 Lethal animal diseases constrain production 81
- Box 4.5 Putting Africa's rich biodiversity to work 83
- Box 4.6 Agroforestry 84
- Box 4.7 The challenge of integrated water resource management 85
- Box 4.8 Legumes and plant-bacteria associations 86
- Box 4.9 Multidisciplinary fight against Striga 89
- Box 4.10 African Agriculture Technology Foundation 90
- Box 4.11 Some promising biotechnologies 91
- Box 4.12 Application and adoption of biotechnologies 91
- Box 4.13 Enhancing the benefits of intercropping maize and sesame 99
- Box 4.14 The evolution of crop-livestock systems in West Africa 100
- Box 4.15 Nutrient monitoring at farm level (NUTMON) 101
- Box 5.1 The evolution of African universities 118
- Box 5.2 Institutional innovations 139
- Box 5.3 New thoughts on agricultural extension 140
- Box 5.4 Roles of information and communications technology in the participatory knowledge quadrangle 143
- Box 5.5 North African National Agricultural Research Systems 157
- Box 7.1 The benefits of globalization and trade liberalization to Africa 193
- Box 7.2 Increased investment in infrastructure lifts productivity and benefits the poor 197

Figures

Figure 2.1	The nutritional challenge over the life cycle	11
Figure 3.1	African farming systems	28
Figure 3.2	Land productivity trends of the major commodities in African farming systems	36
Figure 3.3	The relative impact of radiation, water, nitrogen and phosphorus on growth of annual grasses in the Sahel	38
Figure 3.4	Principles of production ecology and factors affecting growth and yield and food availability	40
Figure 3.5	Yields analyzed according to production ecological principles and under actual field conditions	41
Figure 3.6	Schematic relation between nutrient recovery and agro-ecological conditions	42
Figure 3.7	Trends in the use of fertilizers in farming systems in Africa	48
Figure 3.8	Characteristics of the priority systems	55
Figure 3.9A	Underweight densities and proposed hunger hotspots	56
Figure 3.9B	Hunger hotspots in major farming systems	56
Figure 3.9C	Population density 1995	57
Figure 3.9D	Soil constraints combined	57
Figure 3.9E	Soil texture constraints	57
Figure 3.9F	Soil fertility constraints	57
Figure 4.1	Changes in the total agricultural (crop plus livestock) production index number (PIN), agricultural land use (arable land, permanent crops and permanent pasture) and labour input in the four priority systems	70
Figure 4.2	Changes in the crop production index number (PIN), crop land use (arable land and permanent crops) and fertilizer use in the four priority systems	71
Figure 4.3	Changes in the livestock production index number (PIN) and non-crop land use (permanent pasture) in the four priority systems	72
Figure 4.4	Calculated potential (a) and water-limited (b) yields (tonnes per hectare)	73
Figure 4.5	Actual average cereal yields at the national level	74
Figure 5.1A-B	Distribution of African agricultural research capacity by FTE researchers and R&D expenditures	117

Figure 5.2	Agricultural priorities as reflected by the poverty reduction strategies of 24 African countries	127
Figure 5.3 A-B	Total African agricultural R&D spending and staff by institutional category, 2000-2001	148
Figure 5.4	Trends in public spending by institutional category in selected African countries, 1971-2000	149
Figure 5.5 A-D	Trends in public expenditures, researchers, and expenditures per researcher in selected African countries, 1971-2000	150
Figure 5.6	Share of female researchers in selected African countries, 2000	152
Figure 5.7	Africa's agricultural research intensity compared regionally and globally, 1995	152
Figure 5.8	Funding sources for national agricultural research in selected African countries, 2000	155
Figure 5.9	Cost-category shares in expenditures for the main agricultural research agencies in selected African countries, 2000	155
Figure 5.10 A-B	Commodity focus of agricultural research expenditures in selected African countries, 2000	156
Figure 5.11	Modern variety diffusion by decade and region (percent area planted to modern varieties)	160

Tables

Table 2.1	Factors involved in attaining food security	12
Table 2.2	The extent of child malnutrition in Sub-Saharan Africa farming systems	14
Table 3.1	Farming systems of Sub-Saharan Africa, North Africa and the Middle East	25
Table 3.2	Major animal production systems in African agro-ecological zones	27
Table 3.3	Irrigated land in farming systems in Africa in 2000	49
Table 3.4	Proportions of rainfed areas and production totals in 1995 and projected to 2021-25 in Africa	49
Table 3.5	Indicators for priority assessment in ten major African farming systems	54
Table 3.6	Major characteristics of suggested priority farming systems	60

Table 3.7	Productivity trends for various commodities in the suggested priority farming systems	61
Table 4.1	Gaps in rice yields in various rice ecologies and most relevant constraints to current production	77
Table 4.2	Yield increase in maize due to the adoption of a technology package, comprising improved varieties, fertilizers and pesticides	78
Table 4.3	Constraints to and strategies for adoption of cereal (sorghum and millet) production in the West African semi-arid tropics	79
Table 4.4	The top ten livestock diseases/pathogens according to their impact on the poor	81
Table 5.1	Classification of African countries by the size of their national agricultural research system	116
Table 5.2	Composition of expenditures and researchers in agricultural research and development in selected African countries, 2000	147
Table 5.3	Agricultural R&D intensity ratios in selected African countries for 1981, 1991, and 2000	153
Table 5.4	Rates of return to selected agricultural research projects or programs by geographical region	158
Table 6.1	Comparative cost of graduate degrees in agriculture in various universities	175
Table 7.1	Net gains in economic welfare from global trade liberalization towards 2025	193
Table 7.2	Returns to government investments in rural Uganda	197
Table 8.1	Target audiences and time frames for impact of strategic recommendations	232-233
