## Career summary

- Since November 2014: **MEDICAL RESIDENT - UNICANCER, Paris.**  
UNICANCER groups together 20 French Comprehensive Cancer Centers, which are private, non-profit establishments with a threefold mission of patient care, research and oncology teaching. I am working on the Patients' Expectations Observatory: An unique and innovative initiative in France which aims to identify and prioritize the expectations of the patients and their relatives in order to adjust and improve the quality of services and care provided. We are currently doing a qualitative study to identify the expectations of the patients in terms of innovation and improvement of care.
- Since June 2015: **PRESIDENT - FOUNDER OF THE ASSOCIATION "TAMI (Taboo of miscarriage)"** which I am using to realize my thesis' project: One in three French women have a miscarriage in their life, and it can be a really traumatic experience. But still, most of these patients are taken care of medically, but not psychologically. And too often, these patients' care is even mistreating. That is why I am first realizing a qualitative study to show that there is a real need for a change in this way of treating these women, and a real lack of support (and it concerns their husband/boyfriend... too). Then I'll create, thanks to this association, after a fundraising campaign (led by myself), a program that will include a phone number (opened 7/7) answered by doctors and nurses, to provide direct support or be able to redirect the patient towards an hospital if needed, and a website (+ an app) (with a forum moderated by healthcare professionals, answers to a lot of questions these patients ask themselves without daring to ask and a list of the closest emergency rooms).
- Since November 2014 : **FUNDRAISER - EURONET (European Network of Medical Residents in Public Health).** I am really engaged in this network as I believe that Europe (and moreover the whole world) is the future of medicine and I am working to develop a platform to help the medical resident in public health share their work and idea, and create international work teams.
- December 2014 – June 2015 : **Organization of the 6<sup>th</sup> International Congress of pathography and of the exposition "Giving back a face to History"** linked to the congress, in the Museum Aquarium of Nancy. Pathography is the medical study of dead historical bodies (such as Henri IV or Robespierre). It is one of my passions. I did the fundraising, the practical organization, the communication campaign and the financial management.

- December 2014 – April 2015 : **BIOVISION (production manager and in charge of all the speakers), Lyon**. I was, during the preparation, the one in charge of being in contact with all the speakers, answering their questions and preparing the debates with the facilitators. Then during the congress I was one of the production managers (doing the conductors etc...).
- August 2014 – April 2015 : **In charge of the marketing of the French Chess Federation and part of the marketing committee of the International Chess Federation**
- 2012 – 2013: **Organization of the French Chess championship 2013, Nancy**. 2000 persons, 15 days. I did the practical organization, part of the fundraising, and created “The Night of Chess”, a free event that I hosted myself and which attracted 5000 people, Place Stanislas (Nancy).
- 2011 – 2012 : **FRANCE INTER – “Les jeunes dans la présidentielle” (radio show)**. During a year I worked on France Inter and did some interviews of politicians (such as former Prime Minister Michel Rocard) concerning the presidential elections of 2012.
- 2008 – 2013: **President- Founder of the association “BU by Night”** which aimed to enlarge the opening hours of the libraries, to allow access to equal work conditions to students.
- 2010 – 2012: **ELECTED MEMBER OF THE BOARD OF DIRECTORS OF THE UNIVERSITY HENRI POINCARÉ, Nancy**. I worked in the financial commission and in the disciplinary commission.

## Qualifications

### Languages :

→English : fluent

→Italian : fluent

→German : intermediary

→French : Mother tongue

## Education :

→Clinical skills: 2014 – 2019: **Night shifts in the emergency room of La Pitié Salpêtrière Hospital (Paris)**
